About

The Raleigh Police Department's Crime Mapper provides the public with information about recent reported crime activity in Raleigh. Our goal is to support safer neighborhoods through a better-informed community and to strengthen community-oriented policing efforts.

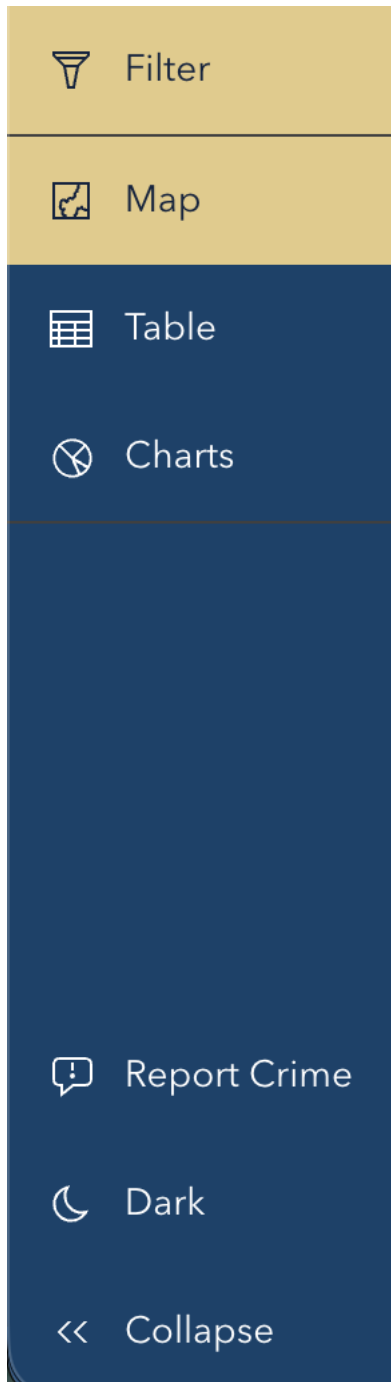

Crime Mapper uses an advanced mapping engine to provide interactive tools for viewing crime activity. Crime data is extracted on a regular basis from the Raleigh Police Department's records system so the information available through your web browser is as current as possible.

Data Notes & Disclaimer

- Crime Mapper displays a rolling 90 days of data and is updated daily.
- To enhance privacy and support accurate offense coding, incidents are displayed with a 1-day delay.
- Locations are generalized to the block level. Incidents are randomly stacked on the block and do not represent an exact address.
- This map is a representation of reported incidents and is not all-inclusive. Some incidents may be updated, reclassified, or corrected after upload, so information may change over time.
- Certain sensitive offenses are not displayed to protect privacy.

Action Bar Controls

The action bar on the left side of the app controls which panels are visible on the right side of the screen.

Top Action Bar Buttons

Filter - Shows or hides the Filter panel, where you can filter incidents by What, Where and When

Map - Controls the Map panel:

- If the Chart panel is visible, clicking Map will hide the Chart panel and show the Map.
- If the Table panel is visible, clicking Map will toggle the Table panel between half-height and full-height.
- If no other panel is visible, clicking Map does not change the display.

Table - Shows or hides the Table panel beneath the Map. The table displays the incidents currently visible on the map and based on your filters.

Charts - Shows or hides the Charts panel beneath the Map. Charts reflect the incidents currently visible on the map and based on your filters.

Bottom Action Bar Buttons

Report Crime - Opens the Raleigh Police Department website to report a crime.

Dark/Light - Switches the application between light mode and dark mode.

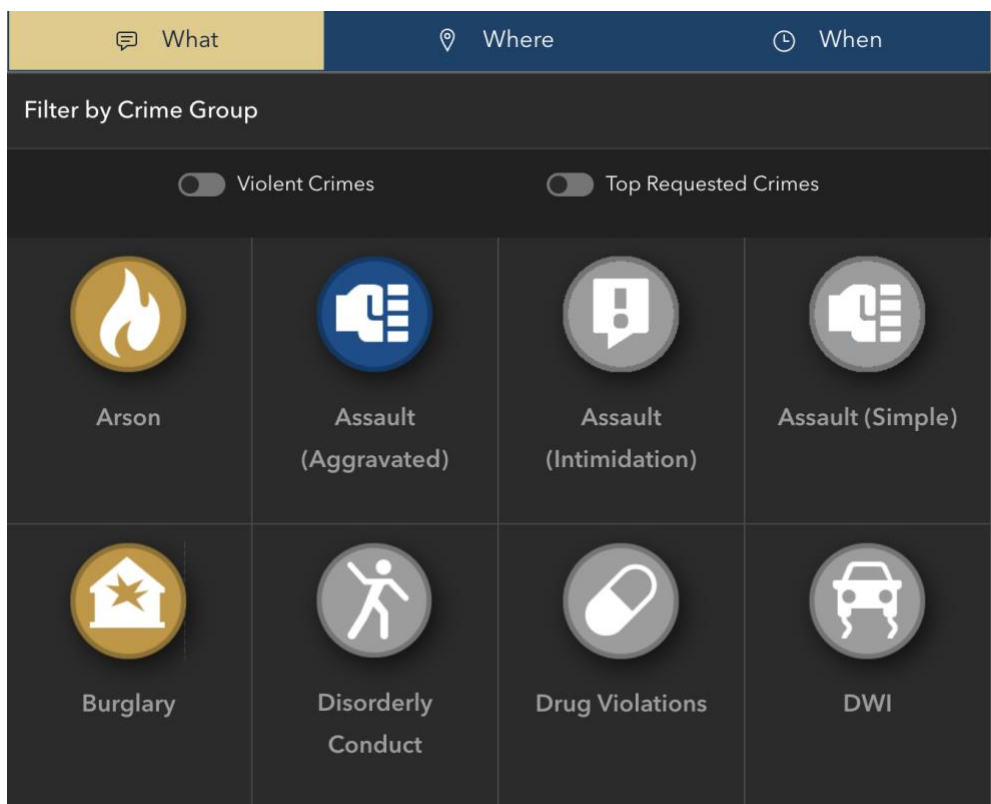

Collapse - Collapses the action bar to show icons only and hide text labels.

Filter Panel

The filter panel allows you to filter by crime category (What), location (Where) and date (When).

What

Use the What tab to filter incidents by crime group and crime description. Optional filters are available to show only Violent Crime categories or Top Requested Crime categories.

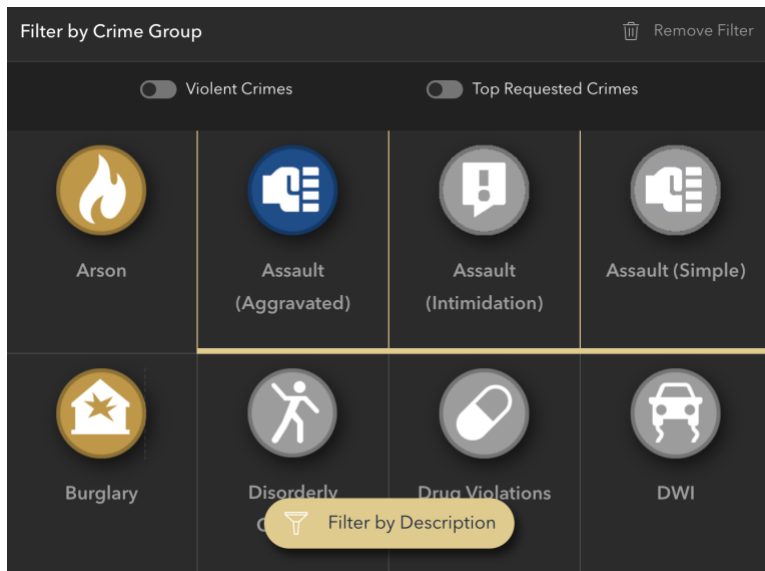

To filter results, click one or more crime groups you are interested in. The map will update to show only incidents in the selected categories.

To clear all selections, click Remove All in the header.

Filtering by Description

When one or more groups are selected, the **Filter by Description** button becomes available. Clicking this button displays a list of descriptions for the selected groups, allowing you to further refine your selection.

In the list of descriptions, uncheck any you are not interested in and check the ones you want to include.

Use the **Select All** or **Select None** options to quickly select or clear all descriptions for a group.

To go back to the main list of crime groups, click the Back button located to the left of Filter By Description.

<

Filter by Description

Assault (Aggravated)

☒ Select All ☐ Select None

☒ Assault/Aggravated (230)

☒ Child Abuse/Aggravated (12)

Assault (Intimidation)

☒ Select All ☐ Select None

☒ Assault/Intimidation-communicating Threats (350)

Assault (Simple)

☒ Select All ☐ Select None

☒ Assault/Simple (1146)

☒ Child Abuse/Simple (130)

Where

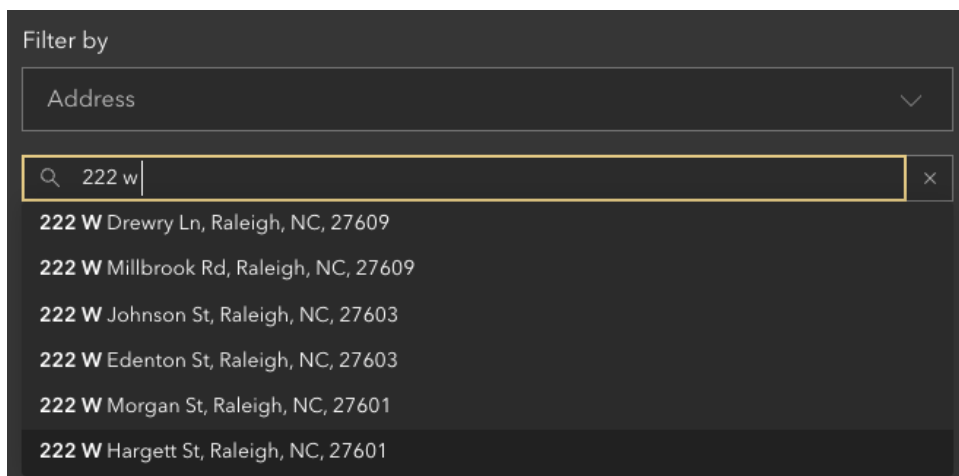

The **Where** tab allows you to filter crimes based on an area of interest. There are four options:

1. **City-wide** – Displays all crimes regardless of location. This is the default setting.
2. **Current Extent** – Displays only the crimes that occurred within the current map view.
3. **Address** – Search for a specific address, crimes near this address will be displayed.
4. **District or Place** – Select from a list of district or place types, crimes within or near the selected feature will be displayed.
5. **Drawn Graphic** – Draw a shape directly on the map to define an area. Crimes within this area will be displayed.

These options allow you to focus your analysis on specific locations or regions of interest.

Address

1. **Enter an Address** – start typing an address in the text box, as you type suggested addresses will appear
2. **Select from Suggestions** – When the address appears in the list of suggested addresses, click it to select.
3. **View Results on Map** – After selecting an address, the map will zoom to that area and display only the crimes within it.
4. **Adjust Search Distance** – By default, the buffer distance is set to 1 mile. You can adjust this distance by entering a new value in the text box (decimals are allowed). The units can also be changed between miles and feet.

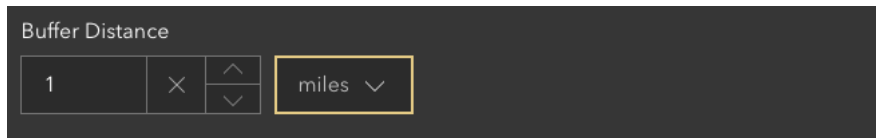

Filter by

Address

222 w

- 222 W Drewry Ln, Raleigh, NC, 27609
- 222 W Millbrook Rd, Raleigh, NC, 27609
- 222 W Johnson St, Raleigh, NC, 27603
- 222 W Edenton St, Raleigh, NC, 27603
- 222 W Morgan St, Raleigh, NC, 27601
- 222 W Hargett St, Raleigh, NC, 27601

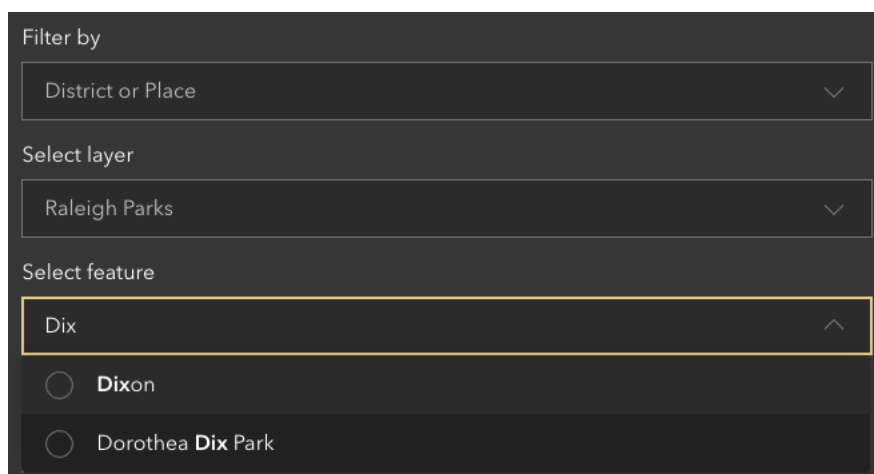

A dark-themed control panel for 'Buffer Distance'. It features a text input field containing the number '1', a clear button (an 'X' icon), and a unit selector dropdown menu currently set to 'miles' with a downward arrow icon.

After selecting from the suggestion list, the map will zoom to that area and filter the crimes on the map.

District or Place

Use the District or Place option to filter crimes by specific areas within the city. Follow these steps:

1. **Select a Category** – Choose from the following district/place types:
 - Police District
 - City Council District
 - Registered Neighborhood
 - Park
 - Greenway Trail
 - Hospitality District (Note: this is a single area and does not have a list of districts.)
2. **Choose Specific Areas** – For categories with multiple areas (all except Hospitality District), a list of corresponding districts or places will appear. Check the ones you want to include in your filter. For those with a long list of places, you can type where it says Select Feature... to narrow down the list.
3. **Set Buffer Distance (Optional)** – You can set a buffer distance in miles or feet to include crimes within a surrounding area.
4. **View Results on Map** – The map will update to display only the crimes within the selected districts or places (including any buffer distance applied).

A dark-themed 'Filter by' panel. It contains three sections: 'Filter by' with a dropdown menu set to 'District or Place'; 'Select layer' with a dropdown menu set to 'Raleigh Parks'; and 'Select feature' with a search input field containing 'Dix'. Below the search field is a list of two items: 'Dixon' and 'Dorothea Dix Park', each preceded by an unselected radio button. The 'Dix' search field and the first item 'Dixon' are highlighted with a yellow border.

Drawing a Graphic

The Drawn Graphic option allows you to filter crimes by manually drawing an area on the map. Follow these steps:

1. **Select a Shape** – Choose the type of shape you want to draw: Point, Line, Polygon, Rectangle, or Circle.
 - If Point or Line is selected, the buffer distance will default to 1 mile, but you can adjust it as needed.
2. **Draw the Shape on the Map**
 - Point: Click once on the map to place the point.
 - Line or Polygon: Click on the map to add each vertex. When finished, double-click to complete the shape.
 - Rectangle or Circle: Click and hold on the map, then drag to adjust the size.
3. **Apply Distance (Optional)** – Adjust the search distance in miles or feet to include crimes within a surrounding area of the shape.

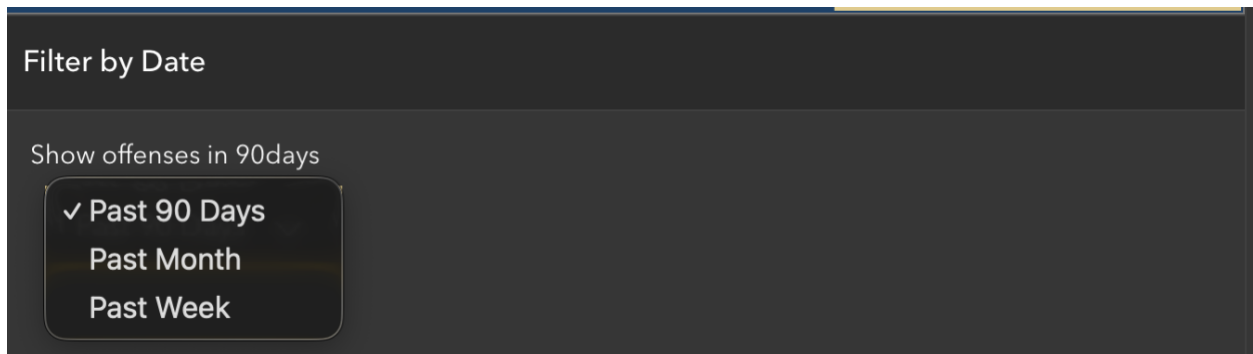

Once the graphic is drawn (and buffer applied, if desired), the map will update to show only the crimes within the defined area.

The screenshot shows a dark-themed interface for a mapping application. At the top, the word "Where" is displayed in white. Below it, the "Area Filter:" section contains a dropdown menu with "Drawn Graphic" selected. Underneath the dropdown is a row of icons: a crosshair, a line, a polygon, a rectangle, a circle, and a trash can. The "Buffer Distance:" section features a text input field with the number "0", followed by a multiplication symbol "x", the unit "miles", and a vertical spinner control with up and down arrows. A circular refresh icon is located to the right of the spinner.

When

There are three options listed to filter the crimes by date:

1. Past 90 Days – default
2. Past Month
3. Past Week

Using the Map

Navigating the Map

You can explore the map using your mouse, touch screen, or mobile device:

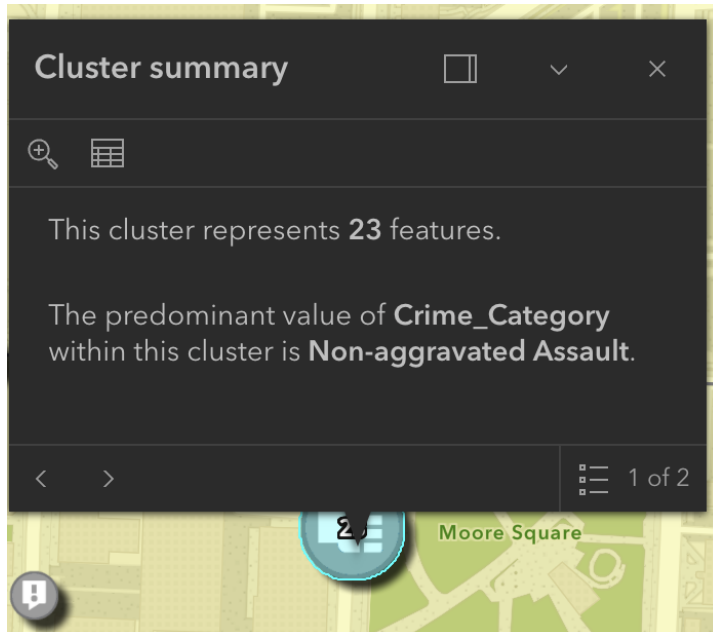

- **Zooming:**
 - Mouse: Use the scroll wheel to zoom in and out.
 - Touch Screen / Mobile / Tablet: Pinch to zoom in or out.
- **Panning:**
 - Mouse: Click and hold on the map, then drag the cursor.
 - Touch Screen / Mobile / Tablet: Drag your finger across the map.

Understanding Crime Symbols

- Crime symbols vary in size and have number labels:
 - Size: Larger symbols indicate more crimes occurred in that area.
 - Number Label: Shows the total number of offenses in that area.
 - Icon Type: Represents the predominant offense in that location.
- Dynamic Display: Zooming in or out will adjust symbol sizes and labels automatically.

Viewing Details

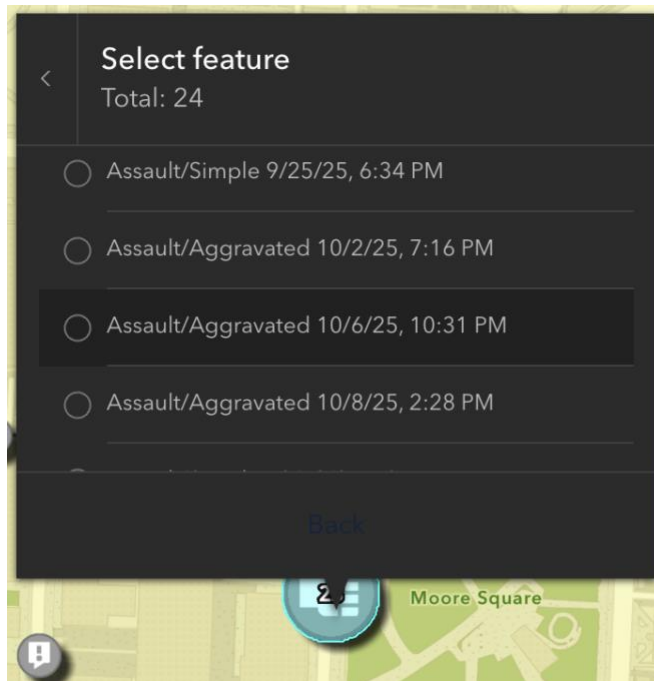

- **Single Feature:** Clicking on a crime symbol will display a popup with details about that specific feature.
- **Cluster of Crimes:** Clicking on a cluster will display additional information about all crimes within that cluster.

When you click on a cluster of crimes on the map:

- The popup will show the total number of offenses in that cluster and the predominant offense type.
- To view a full list of all offenses in the cluster, click the table icon in the upper-left corner of the popup (next to the zoom button).

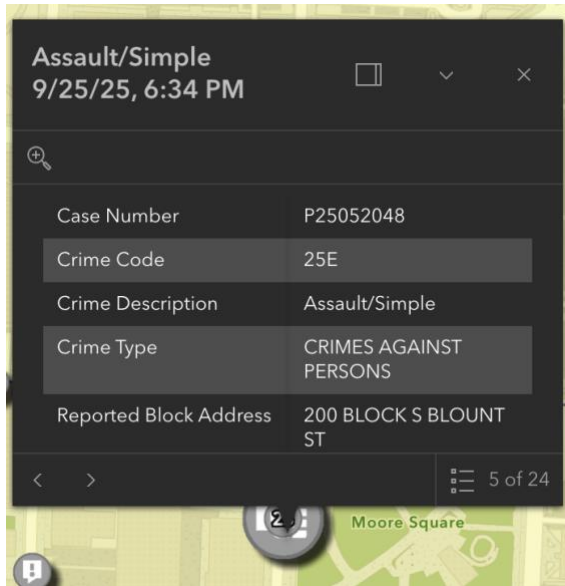

This allows you to see both a summary and the detailed records for any group of crimes.

The list of offenses in a cluster displays:

- **Crime Category** – The type of offense.
- **Date of Crime** – When the offense occurred.

Selecting an offense from the list will display additional information about that specific crime, allowing you to view details for individual incidents within the cluster.

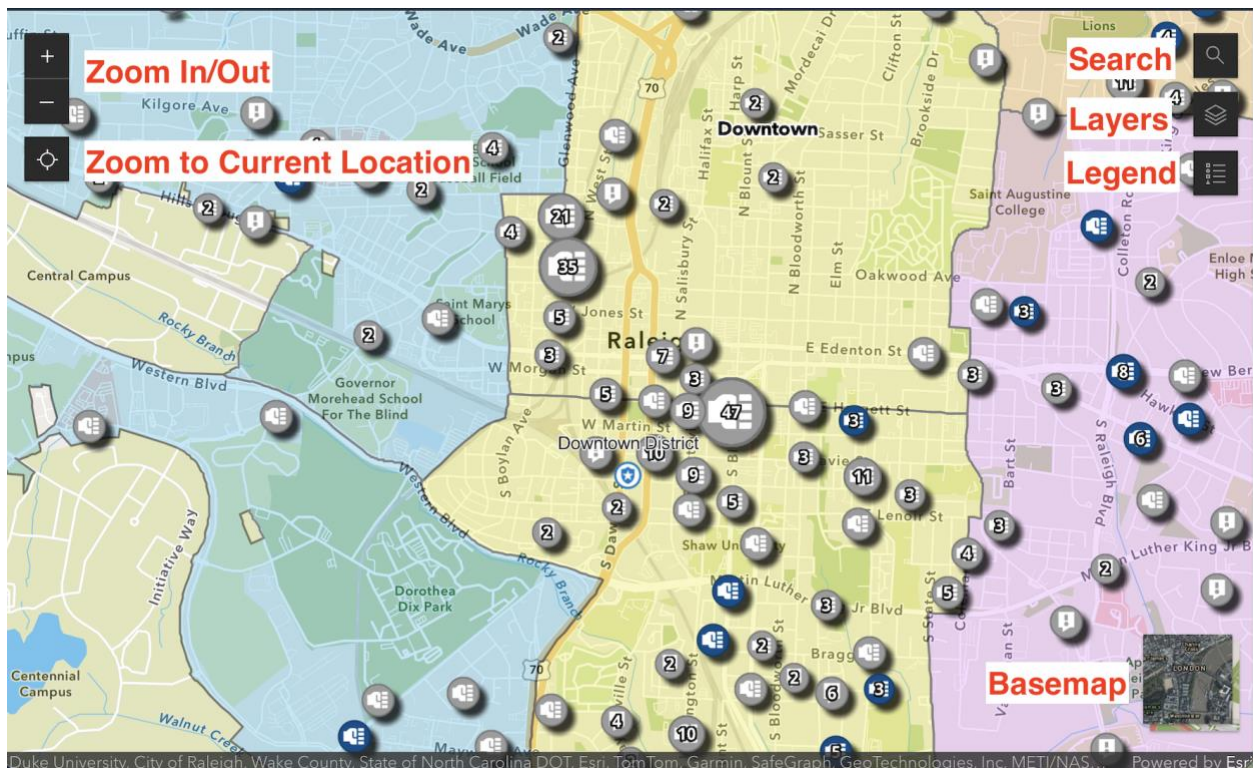

When viewing the details of a specific offense from the cluster list:

- Use the < > buttons in the bottom-left corner of the popup to move to the previous or next offense in the list.
- To return to the full list of offenses, click the button in the bottom-right corner (e.g., “5 of 24” in the screenshot).

This makes it easy to browse through multiple offenses without returning to the main map each time.

Using Map Tools

The map includes several tools to help you navigate and explore data more effectively.

Top-Left Tools

- **+** **Button:** Zoom in one level.
- **-** **Button:** Zoom out one level.
- **Zoom to Current Location:** Centers the map on your device's current location. You will be prompted to allow the application to access your location. Note: Your device's location is not stored.

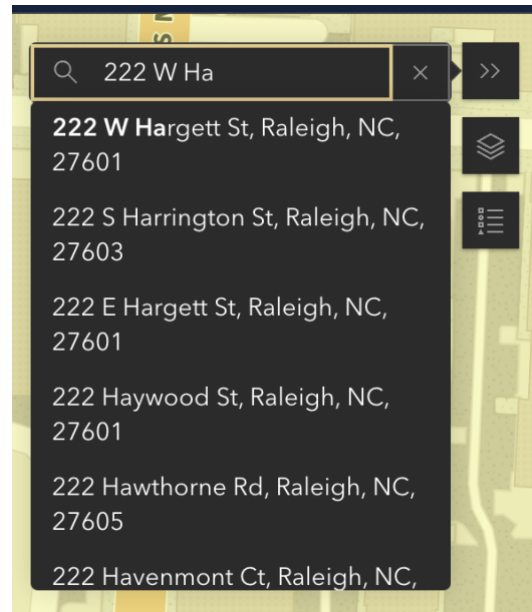

In the top left you can click the + button to zoom into the map one level and the - button to zoom out on the map one level.

If you want to zoom to the current location of your device, click the Zoom to Current location button. You will be asked to give the application permission to use your location. Note: we do not store your device's location.

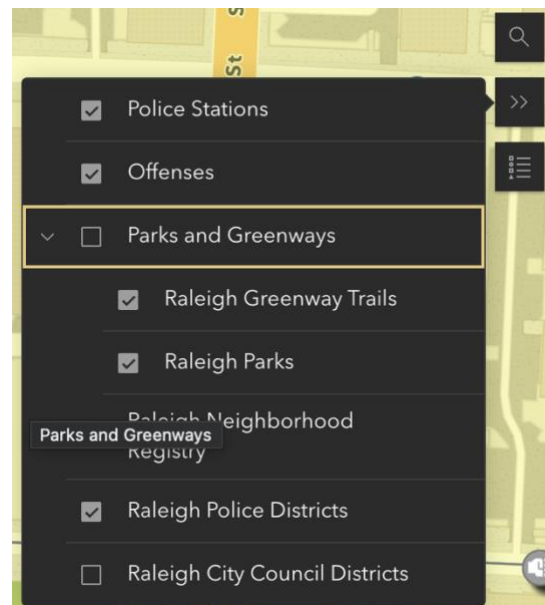

Top-Right Map Tools

The following tools are available in the top-right corner of the map:

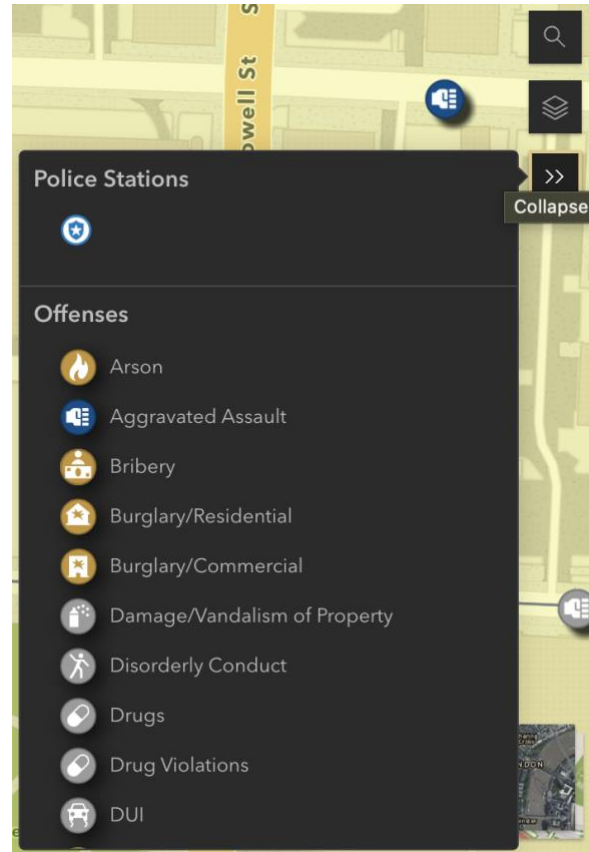

1. **Search** – Enter an address and select it from the list of suggestions. The map will zoom to that location. Note: This tool does not filter the crimes; it only navigates the map.

2. **Layers** – Display additional layers on the map. Check or uncheck the layers you want to show or hide.

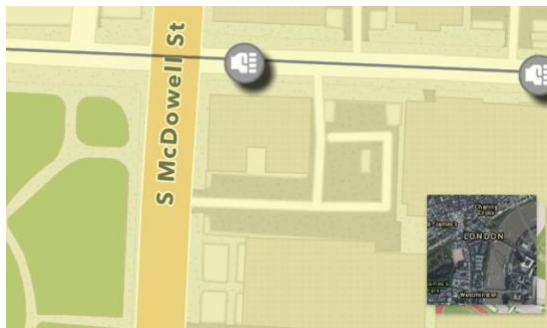

3. **Legend** – Display a legend that explains the meaning of the symbols and icons shown on the map.

Basemap Toggle

In the lower-left corner of the map, you can switch between the Street base map and Satellite imagery. Simply click the box to toggle between the two views.

Table

The table provides a detailed view of all crime incidents displayed on the map. It allows you to sort and explore individual offenses in a tabular format. Using the table, you can quickly find specific crimes, view details such as offense type, date, and location, and navigate directly to the corresponding feature on the map.

Sort by Column

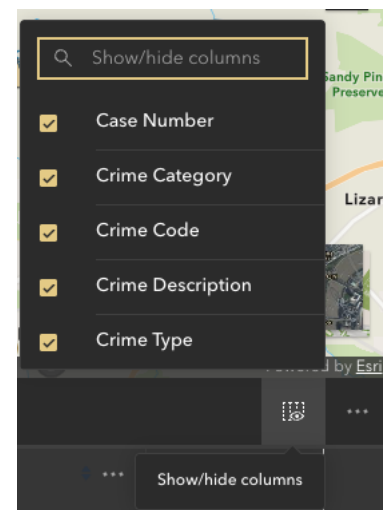

To sort the table by a specific column:

1. Click the Column Header – Clicking once will sort the column in ascending order.
2. Click Again – Clicking a second time will sort the column in descending order.
3. Click a Third Time – Clicking a third time will return the table to its original order.

Showing or Hiding Columns

To customize which columns are visible in the table:

1. Click the first button in the upper-right corner of the table.
2. Check the columns you want to show or uncheck the columns you want to hide.

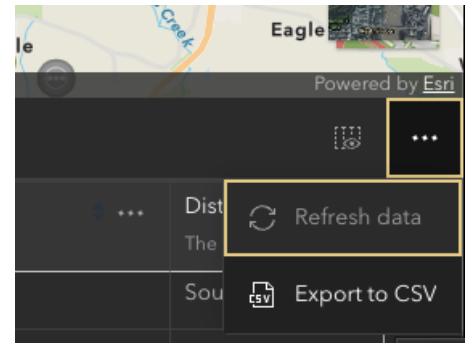

Exporting the Table to CSV

To export the table of offenses:

1. Click the “...” button in the upper-right corner of the table.
2. Select **Export to CSV**.
3. A CSV file will be created, which you can download and open in spreadsheet software for further analysis.

This allows you to save and work with the data outside of the application.

Zooming to a Specific Offense

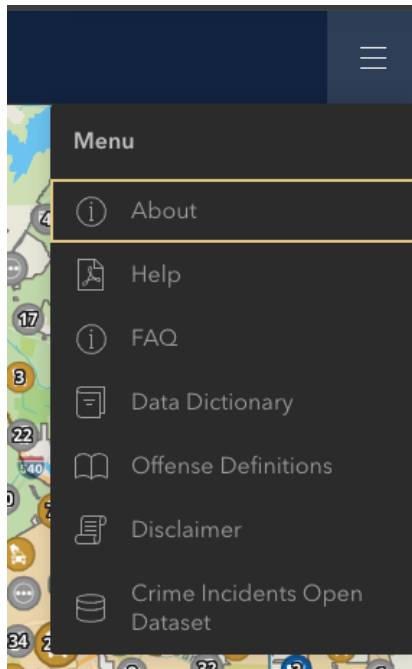

To locate a specific offense on the map:

1. Find the offense in the table.
2. Click the button on the far right of that row.
3. The map will zoom to the location of the selected offense.

...	City	...	District	
le...			The policing district in	
	RALEIGH		Southwest	⌕ ⌕ ⌕
	RALEIGH		Northeast	⌕ ⌕ ⌕
	RALEIGH		North	⌕ ⌕ ⌕
				Go to feature

Menu

Use the hamburger menu (☰) in the top-right corner of the header to access additional information and options related to the application.

About – Information about the application.

Help – Opens the help document for using the app.

FAQ – Frequently Asked Questions about the app.

Data Dictionary – Displays descriptions of the data fields shown for each offense.

Offense Definitions – Provides definitions for each offense category.

Disclaimer – Displays the disclaimer that appears when the app loads.

Crime Incidents Open Dataset – Opens the dataset used in the application on the Open Data portal.

Frequently Asked Questions

About

Q: Where does Crime Mapper obtain the crime data?

A: All data shown on this site is provided with the knowledge and approval of the Raleigh Police Department. Data is extracted and published through authorized processes (not web scraping or other unapproved collection).

Q: How often is the crime data updated?

A: Crime Mapper is updated daily and displays a rolling 90 days of activity. Incidents are displayed with a 1-day delay to enhance privacy and allow for improved offense coding accuracy.

Q: What types of crimes are displayed?

A: Crime Mapper displays selected categories of reported incidents. Use the map legend to view each crime type and its definition. Certain sensitive offense types are excluded to protect privacy.

Q: Is there a cost to use Crime Mapper?

A: No. Crime Mapper is provided as a free public resource.

Q: How can I get more detailed information about a crime?

A: For additional incident details, use the Raleigh Police Department's process for obtaining a police report:

<https://raleighnc.gov/police/services/how-obtain-police-report>

Q: How can I get data that is older than 90 days?

A: For data beyond what appears in Crime Mapper, visit Raleigh's open data portal (search "police" or related terms):

<https://data.raleighnc.gov/search?q=police>

You may also request certain records through the police report/public records process above.

Data & Privacy

Q: Why is a crime I know about not showing on the map?

A: Crime Mapper is an overview and is not all-inclusive. An incident may not appear because:

- It is within the 1-day display delay.
- It has not yet been entered/confirmed at the time of upload.
- It was handled by another agency.
- It is a sensitive offense that is excluded to protect privacy.
- The incident was updated or reclassified after upload.

Q: Are addresses exact?

A: No. Locations are generalized to the block level, and incidents are randomly stacked on the block. The point shown does not represent an exact address.

Q: Does the time shown represent when the crime occurred or when it was reported?

A: The time shown represents the report date/time.

Using the Map

Q: Why don't the charts show every crime type?

A: Charts and reports reflect the incidents currently included in your map view and filters. To see different results, adjust the date range (within 90 days), zoom, or change crime type selections, then refresh the report/charts.

Issues & Troubleshooting

Q: The map doesn't load. What should I do?

A: Try refreshing your browser (Ctrl+R / Shift+Reload). If the issue continues, clear your browser cache or try another browser.

Q: What browsers are supported?

A: Crime Mapper supports most modern browsers including Chrome, Edge, Firefox, and Safari.

Accessibility

The City of Raleigh is committed to accessibility. If you need accommodations or materials in alternate formats, please contact the City of Raleigh ADA Coordinator or submit an accessibility request through the City's official channels.
